INFO

The Slip-On Line represents the first step in the exhaust system tuning process and offers a great balance between price and optimum performance. The systems are lighter compared to the stock exhaust system and feature exceptional production quality and increased engine performance combined with pure racing sound output. A combination of racing materials like carbon fibre for the end cap give these exhaust systems a racing touch.

For installing the Slip-On Line system, the stock exhaust system has to be cut. Please read the instructions carefully before the start of the installation.
